PROFESSIONAL SUMMARY

With a strong technical skill-set, attention to detail, and 2+ years of experience, my passion and desire is to work professionally as a Full Stack Web Developer, where I can use my technical knowledge to elevate user experience to the next level. I am passionate about web development and thoroughly enjoy learning about new web technologies. I spend much of my free time studying and expanding my professional knowledge.

SKILLS

- Frontend Web Development: HTML5, CSS3, JavaScript (ES6), jQuery, Bootstrap, React/Redux.
- Backend Web Development: PHP, C/C++, MySQL/SQL.
- CMS experience: Expression Engine, WordPress, Magento 1 and Magento 2.
- Experience with Git, GitHub and Gitlab.
- GreenSock: GSAP Animation and HTML Animated Banners.

- Ability to build HTML emails.
- Experience with Heroku
- API Integration with JavaScript/PHP
- Firm understanding of CSS preprocessors (LESS/SASS).
- Knowledge of photo editing software (e.g. Gimp, Photoshop).

WORK HISTORY

Interactive/Frontend Developer, 06/2017 to 10/31/19

PureRED Integrated Marketing – Stone Mtn, GA

- Developed multiple landing pages using HTML5, CSS3, JavaScript and jQuery for clients including Dollar General, Sears, Bevmo and Old Time Pottery.
- Built HTML emails for clients like Baldacci's and Kings Food Market.
- Utilized Responsive Web Design and Frameworks.
- Assisted in building multiple WordPress sites and helped maintain them for clients including Nasacort and Xyzal.

- Assisted in developing PHP Templates used to minimize development time within the workplace for clients like Sears.
- Built and implemented AJAX MailChimp signup form.
- Created and edited Animated Banners using Green Sock (JavaScript animation Framework).
- Implemented ES6 and used it to optimize and create multiple personal and professional projects (many of which are hosted on my portfolio site under the work page), including landing pages and React Projects.
- Used React professionally on a project called the OMS, which allowed clients to select custom advertisements and pricing. It was a project originally built in Angular and rewritten in React with C# and ASP.net as the backend.
- Used Redux professionally to help manage global states in a web application that previously did not implement it (OMS).

Freelance Web Developer, 01/2016 to 05/2016

Self Employed – Atlanta, Georgia
- Designed, implemented and monitored web pages and sites for continuous improvement in fast-paced environment.
- Introduced to HTML5, CSS3 JavaScript and jQuery.
